Follow the White Rose <https://whiterosemaths.com/homelearning> lessons for the **current week**, watching the daily teaching videos and doing the activities as instructed. (Hide the answers to the RPS questions until you have had a go!) I will attach the worksheets that accompany the daily lesson videos.

Making a desert island.
How are those islands going? I'm sure they are starting to look really good. (Remember to wait until it's dry before painting, if you have used papier mache for your base.)
I hope you're having lots of fun making them!

Music: I Wanna be in a Band (Session 6)

Join us for this energetic session of movement and singing!

Mandarin:

Live session with Miss Wang. Here is the link and password for you to join the class:

Science: Everyday Materials

Melting and Moulding: We are learning about what happens when a material is heated up and why it changes shape. We will be looking at what happens to the particles under heat, during the live morning session. We are also looking at the importance of recycling materials.

(See attachment for investigation) *When remoulded, which shapes are more useful for holding and colouring with?*

We have recycled our old wax crayons! What other materials do we recycle? Can you think of other examples of things that change shape and become something else, something useful? Why is it important to recycle materials?

Fun and Games Friday!
